

PROGRAM CONSULTANTS

2006

In situations where knowledge and/or technical skills are needed that cannot be supplied by regular staff positions, technical and consultant assistance will be considered as one alternative for providing the desired service. The service will be provided consistent with budgetary appropriations.

The administrator staff of the district shall encourage the use of professional consultants from the Department of Public Instruction, colleges, universities, and other sources, when members of the staff feel such consultative services will be helpful in the improvement of the instructional program. All consultants should be approved by the administrator prior to the invitation and arrangement for visitation by such person or persons to the school district.
