

TEACHING ABOUT DRUGS, ALCOHOL, AND TOBACCO

7014

Drug education shall be based on the philosophy that drug abuse includes a physical or mental state resulting from the use of a drug for any purpose other than its medically prescribed use, and that this mental and/or physical effect precludes realization of the educational potential of the individual. The objectives of the drug education curriculum are rooted in the Board's belief that prevention requires education and that the most important aspect of the policies and guidelines of the District should be the education of each individual student to the dangers of drug use. The District Administrator shall be responsible to establish and periodically review the District's guidelines for staff members in conducting drug education and dealing with drug abuse.
