

SCHOOL SPONSORED ACTIVITIES

8009

The North Lake School District will, at times, lend its support and sponsorship of specific programs and endeavors. In order for an activity or an organization to be deemed sponsored by the School District, the Board must take action authorizing the sponsorship. Those activities that are sponsored by the District are accountable to the North Lake School Board. The School Board, through their designee(s), may administer and direct the activity that is sponsored.

In order for an activity to be sponsored by the District, a written request should be made to the School Board, through the School Administration, requesting sponsorship. Application for sponsorship should include information about the activity or program that identifies the purpose of the activity, benefit to children or the District as a whole, leadership or directorship of the activity, duration, location, and additional support resources required.

All bylaws, charters, organizational guidelines, and rules will be subject to the approval of the School Board. All monies collected and spent within and for a school sponsored activity are to be accountable to the School Board and be included in the annual School Financial Audit. The school sponsored activity or endeavor will be subject to all of the School District policies and procedures.

School sponsorship of an activity may include, but is not limited to, School District insurance liability coverage, use of school facilities, dedication of school personnel, and school materials and supplies. The use of supplies and resources under \$15,000 will be at the discretion of the School Administration.
